## **HOW AUTOWAKE WORKS**

AUTOWAKE® FEATURES FOUR PATENTED SYSTEMS THAT WORK TOGETHER TO AUTOMATICALLY AND CONTINUOUSLY MANAGE THE POSITION OF YOUR HULL FOR A PRECISE AND REPEATABLE WAKE FOR EVERY RIDER, IN EVERY WATER CONDITION.

## PITCH & ROLL ADJUSTMENTS

AutoWake constantly measures pitch and roll to automatically drain or fill ballast.

## PREDICTIVE STATE TECHNOLOGY

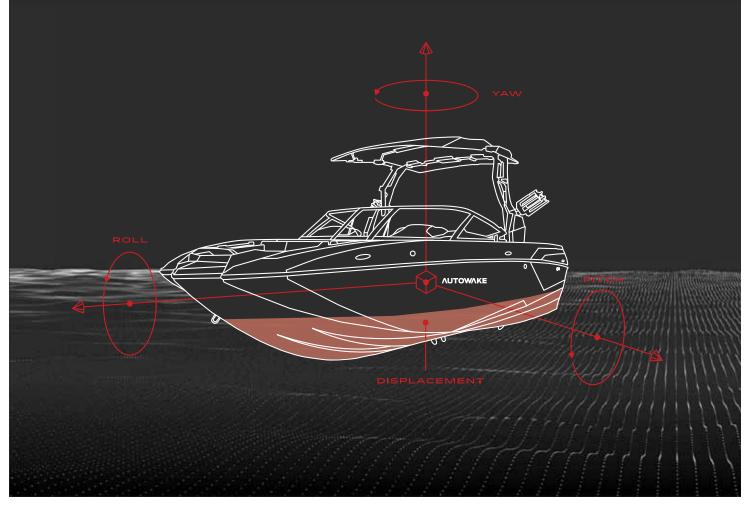

Senses and fills ballast to predicted levels to provide a precise wave.

## CUSTOM RIDER PROFILES

Personalized wakes and waves are a button push away with customized rider profiles.

#### AMPLITUDE DISPLAY

See how the boat's displacement in the water effects wake shape, size and performance.

We optimized the Supra Swell™ Surf System to provide tall waves with long pockets and optimal push that's consistent on both sides of the wake—the perfect waveshaping tool for riders who love to transfer from side to side.

The Supra Launch System puts your boat on plane faster with full ballast. Both the Swell™ Surf System and SmartPlate™ deploy during acceleration to provide the right amount of drag to pull your boat on plane quicker.

The Supra SmartPlate has multiple functions. It can adjust the length and shape of the wake or wave for a tailored ride, and its contoured edges help smooth out rough water.
